

XM Radio has provided me with not only a vital means of entertain-ment, but a way of keeping up with world news, weather & traffic, and sports results while traveling in my vehicle. Often times I travel many miles through mountainous areas where regular AM/FM radio reception is at best poor or non existent. Restricting XM Radio in it's ability to broadcast all forms of news, traffic, weather, sports, and music would be a grave injustice to XM Radio subscribers. There should be no difference between XM Radio and satellite TV broadcasts.
